Message from the Collection Editor

Dear Colleagues,

The influence of environmental factors during prenatal development on phenotypic diversity across the lifespan is widely recognized, and the phenomena of fetal programming and vegetative imprinting have been studied in several animal species. Even in precocial birds, as all poultry species, environmental factors during incubation can determine the developmental trajectory throughout life.

Therefore, knowledge of embryonic development and organism-environment interactions is essential to optimize the incubation process to improve post-hatching robustness, adaptability, health, and ultimately to ensure primary performance and welfare.

.....

Hatchery environment, management of embryo development in conjunction with the physiological needs of the embryos become key factors in the poultry production chain. New approaches require new technical solutions and optimizations.

This Topical Collection will be dedicated to new developments in this broad field, both in basic and applied research.

Message from the Editor-in-Chief

Poultry is a newly established, online, open access journal that aims to publish high-quality research on topics in various areas of poultry production and health. This research should reflect the eminent and increasing importance of all poultry species reared for human nutrition. *Poultry* adheres to rigorous peer-review and editorial processes. Containing specialists from different areas in this field of research, the Editorial Board enthusiastically works to safeguard the quality of the review process and your contribution. A dedicated support team from the publisher is available, when required, to offer help and support for specific requests. Equipped with such a wide breadth of knowledge and expertise, *Poultry* should be the landmark for research on poultry science.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.1 days after submission; acceptance to publication is undertaken in 7.8 days (median values for papers published in this journal in the second half of 2023).

Recognition of Reviewers: APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
