Message from the Guest Editors

The remediation of contaminated sites has been one of the most rapidly developing environmental research subjects. The process of the remediation of contaminated sites is a site-specific phased approach comprising site characterization, risk assessment and remediation technology selection and application.

With the success of the previous Special Issue “Advances in Remediation of Contaminated Sites: **Volume I**”, **Volume II** of this Special Issue will continue to collect the latest progress in the remediation of contaminated sites, in order to help in solving the bottleneck in the development of site remediation technology. Topics of interest include but are not limited to:

- Survey and assessment of contaminated sites;
- Environmental processes and effects of pollutants;
- Remediation technology and its application in contaminated sites;
- Remediation strategy and management in contaminated sites.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
