Message from the Guest Editor

Dear Colleagues,

Today, the scientific community faces crucial challenges in delivering a healthier world for future generations. Among these, the quest for circular and sustainable approaches to materials recycling is one of the most demanding for several reasons. Indeed, the massive use of chemical materials over the last century has generated large amounts of long-lasting waste, which has not been the object of adequate recovery and disposal politics for a long time. Significant breakthroughs in the field of reuse and recycling of materials have been achieved in recent years. This Special Issues will focus on:

- Processing of recycled material wastes;
- Upcycling methods, including mechanical, biotech, and chemical/pyrolysis recycling;
- Material wastes, including polymers, rubber, batteries, electronic materials, semiconductors, etc.

Prof. Dr. Ho-Shing Wu

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
