Deadline for manuscript
submissions:

20 January 2025

Message from the Guest Editors

The worldwide crisis of organic solid waste (OSW) generation has caused concerns about a continuous uptrend of natural resource consumption. Anaerobic fermentation (AF), with volatile fatty acids (VFAs) as the main product, has been widely used for OSW disposal and energy recovery. This Special Issue focuses on the resource recovery from organic solid waste using fermentation and hydrolysis technologies, and we hope that the Special Issue will become a platform for realizing experiences and sharing valuable research findings on the latest trends in advanced technologies for fermentation and hydrolysis of OSW.

Relevant topics include, but are not limited to:

- Challenges of fermentation and hydrolysis technologies for OSW;
- Strategies to enhance fermentation;
- Hydrothermal recycling technologies;
- Oriented conversion technologies for carbon and nitrogen recovery;
- Agricultural and forest OSW treatment.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
