Message from the Guest Editors

Industry 4.0 includes IoT, big data analysis, artificial intelligence, machine learning, real-time data processing, smart manufacturing, machine-to-machine communication, digitization, additive manufacturing, enterprise resource planning, and cyber-physical systems. Industry 4.0 spans across the complete product lifecycle, including supply chain, inventory management, customer feedback, quality, recycling, etc.

The articles in this Special Issue on “Industry 4.0: Integrating Advanced Manufacturing Technologies, Artificial Intelligence, and Contemporary Information Technology” will present cutting-edge developments in research that either make use of the concept of Industry 4.0 and one of its main pillars, smart manufacturing, or demonstrate the advancements in these fields with improved frameworks and applications of modern technologies in manufacturing.

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
