Message from the Guest Editors

Industry 4.0 includes IoT, big data analysis, artificial intelligence, machine learning, real-time data processing, smart manufacturing, machine-to-machine communication, digitization, additive manufacturing, enterprise resource planning, and cyber-physical systems. Industry 4.0 spans across the complete product lifecycle, including supply chain, inventory management, customer feedback, quality, recycling, etc.

The articles in this Special Issue on “Industry 4.0: Integrating Advanced Manufacturing Technologies, Artificial Intelligence, and Contemporary Information Technology” will present cutting-edge developments in research that either make use of the concept of Industry 4.0 and one of its main pillars, smart manufacturing, or demonstrate the advancements in these fields with improved frameworks and applications of modern technologies in manufacturing.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
