### Message from the Guest Editors

Wastewater treatment (domestic, industrial, hospital) is one of the most important environmental technologies. Today's water treatment technologies must be considered from the perspective of the big picture, horizontal and vertical comprehensiveness: origin and transport of wastewater, purification, reuse, inclusion in water receivers, distribution of volatile pollutants and odors in the air, and carbon dioxide emissions. Particular attention is paid to the control of those hazards that remain after treatment and pass into the water receivers, or remain in the water for reuse and damage human health and greatly reduce biodiversity. Significant emphasis is placed on deep (solving problems at the micro- and nano-level) and high technologies and biotechnologies (including modern analytical systems, biosensors, microchips, specialized software, and artificial intelligence) for solving the above-mentioned global problems.

Deadline for manuscript  
submissions:

**closed (15 March 2024)**

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Giancarlo Cravotto**

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**,  
**SCIE (Web of Science)**, **Ei Compendex**, **Inspec**, **AGRIS**, and **other databases**.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
