Message from the Guest Editors

Dear Colleagues,

Nature is a valuable source for development and design of drug-lead compounds that could significantly impact the treatment of serious diseases, enhancing general health and wellbeing. Herbal systems play a fundamental role in healthcare, as 60% of chemotherapeutic agents are derived from natural sources. The emergence of cutting-edge technologies and methods that improve the drug design process has provided new ways of processing complex natural products, using their structures to develop new and innovative drug candidates with reduced side-effects.

In this Special Issue of *Processes*, we aim to summarize the current trends in drug discovery and development, while reporting the latest applications of natural products to combat current and future health challenges, as well as strategies and computational approaches that facilitate the design of new and innovative drugs with greater accuracy, low costs, and high efficiency using natural sources.

Keywords

- natural products
- drug discovery and development
- global health challenges
- computational methods
- drug repurposing

an Open Access Journal by MDPI

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
