Deadline for manuscript  
submissions:

**closed (15 April 2024)**

### Message from the Guest Editors

Natural gas hydrate is considered as a promising source of energy for the 21st century, which has attracted widespread attention for the last decades.

The special issue, “Production of Energy-efficient Natural Gas Hydrate”, aims to report on the latest findings on hydrates from researchers around the world, covering experimental, theoretical, and simulation studies. We encourage original research papers on this special issue from a wide range of topics regarding hydrates including, but not limited to:

- Fundamentals of gas hydrate phase transfer
- Natural gas hydrate production technologies
- Environmental impacts of gas hydrate (Climate, Geohazard, etc.)
- Natural gas hydrate resource (Characterization, Exploration, Recovery, etc.)
- Flow assurance
- Hydrate-based CO<sub>2</sub> capture and storage
- Numerical simulation (Laboratory scale, Site scale, Prediction, etc.)

an Open Access Journal by MDPI

Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
