Message from the Guest Editor

This Special Issue “Chemical Characterization and Bioactivity Evaluation of Medicinal Plants” aims to present advances in the studies of chemical composition of medical plants, as well as the biological activity of medicinal plants with a special emphasis on the possible mechanisms of action evaluated on Alzheimer’s disease, inflammatory diseases, diabetes, and cancer. Topics include but are not limited to:

- Chemical components of medicinal plants;
- Bioactive natural compounds present in medicinal plants;
- The effects of medical plants on cancer and chronic disease;
- Mechanism studies of medicinal plant components;

Research articles and reviews covering the effects of extracts and/or pure compounds and focusing on their aid in the control of cancer and chronic diseases, are also welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus,
SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
