Message from the Guest Editors

Enzyme engineering, often coupled to process engineering, has been shown to provide a sound approach to tackle these issues and improve the catalytic and stability features of several enzymes. In addition, methodologies such as continuous flow, already well-established in chemical processes, have been increasingly used in biocatalysis, given their potential to increase overall bioconversion rates due to increased mass transfer and enhanced throughput of material.

This Special Issue on “Biocatalysis, Enzyme, and Process Engineering” aims to address novel advances in the development and application of enzymes in the production of goods of interest for large-scale production. Topics include but are not limited to the following:

- Enzyme engineering towards improved biocatalysts;
- The development of novel process designs for biocatalysis;
- Multienzyme cascade reactions.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
