Deadline for manuscript submissions:
31 July 2021

**Message from the Guest Editors**

The Special Issue, “Bioreactor System: Design, Modeling and Continuous Production Process”, will address experimental/theoretical research and latest progress in the field of bioreactor systems.

Bioreactors play an important role in many industries, including fermentation, food, pharmaceuticals, and wastewater treatment. Bioreactor is the heart of any biochemical process in which enzymes, microbial, mammalian, or plant cell systems are used for the manufacture of a wide range of useful biological products. The objective of this issue is to showcase the diversity and advances in research that contributes to developing effective systems for the microorganism culture and biochemical production.

Original papers are solicited on experimental/theoretical studies on bioreactor systems. We are particularly interested in receiving manuscripts that integrate biology and engineering research and/or experimental and theoretical studies. We invite researchers from all areas of bioengineering to submit manuscripts for this important Special Issue of *Processes*. 
Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and many other databases.
Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 11.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2021).
