### Message from the Guest Editor

This Special Issue entitled “A Glimpse into Green Chemistry Practices in Academic Laboratories and the Pharmaceutical Industry” aims to enhance new approaches and developments from academic research with potential industrial applications of green chemistry practices and processes. Indeed, this issue will share recent developments from academic laboratories and link them to the pharmaceutical industry, with the aim of an objective and critical evaluation of those processes and practices. Topics include but are not limited to:

- Alternative sources of energy;
- Catalysis;
- Alternative and green solvents;
- Scale-up synthesis and reactions;
- Computational investigations oriented to reduce traditional research;
- Use of waste materials;
- Emerging reagents;
- Green chemistry metrics.

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Giancarlo Cravotto**

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
