Germany

Deadline for manuscript
submissions:

closed (31 March 2022)

Message from the Guest Editor

Continuous crystallization is in focus in recent years to overcome the bottleneck in the fully continuous production process for high efficient operation. But, there is a lack of reliable equipment and online analysis techniques for small-scale continuous crystallization and subsequent downstream steps like solid-liquid separation and drying, which are needed in the field of pharmaceuticals and fine chemicals.

This special issue on "Continuous Crystallization and Product Design" aims to bring together new advances in the development and application of small-scale continuous crystallization, solid-liquid separation and drying to overcome the long-standing challenges of fully continuous production of pharmaceuticals and fine chemicals. The topics include, but are not limited to:

- Advances in fundamental knowledge for process understanding
- new equipment and use of existing equipment on new products
- continuous nucleation methods
- online process analysis technologies (PAT)
- modelling and simulation of continuous processes

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **Inspec**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
