### Message from the Guest Editor

Dear Colleagues,

Extracellular vesicles (EVs) are now considered as essential biological macromolecules that are surrounded by lipid bilayers and released from most cell types in our body. Their emerging role suggests that EVs regulate various physiological processes, including immune response, vascular functions, tumorigenesis, neuronal functions, as well as metabolism via intercellular communications.

However, it has not been clearly suggested or demonstrated how EVs are released from cells, diffused into our body, and transported to specific cell types to have biological/physiological functions. This question is fundamental to develop novel biomarkers and potential clinical applications using EVs.

This Special Issue on “Function, Diffusion and Transport Processes of Extracellular Vesicles” aims to provide novel concepts and clear evidence of EV trafficking in various disease states. Topics include but are not limited to:

- Release mechanism of EVs;
- Trafficking process and mechanism of EVs;
- Transportation mechanism of EVs;
- Regulation of EV trafficking process in disease states.

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
