Message from the Guest Editor

This Special Issue on “Internal Combustion Engine Combustion Processes” aims to curate novel advances in the development and application of low-carbon, carbon-neutral and carbon-free fuels to internal combustion engines, and in the development and application of novel combustion techniques with traditional fossil fuels. Topics include, but are not limited to:

- Fuel injection systems and processes for carbon-neutral and carbon-free fuels;
- Atomization and spray processes of carbon-neutral and carbon-free fuels;
- Development of combustion mechanisms for carbon-neutral and carbon-free fuels;
- Innovative combustion processes with traditional fuels;
- Optical diagnostics and numerical simulation for flow, spray and combustion processes in internal combustion engines;
- Emission control technology and equipment for carbon-neutral and carbon-free fuels;
- Abnormal combustion suppression technologies for carbon-neutral and carbon-free fuels.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **InspeC**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
