Message from the Guest Editors

This Special Issue seeks high-quality works focusing on the latest novel advances in modeling technology for both machine-learning-assisted intelligent optimization and its applications. Topics include but are not limited to:

- Machine-learning-based intelligent processing used in complex manufacturing system modeling;
- Metaheuristic algorithms for system identification and optimization;
- Multisource data fusion for complex industrial systems;
- Mobile computing and sensing for real-time system simulation;
- Distributed multiagent modeling algorithms and their industrial applications;
- Industrial applications of complex system theory;
- Data-driven intelligent modeling for brain computing;
- Stability and qualitative analysis of complex networks;
- Malware detection and classification for industrial control systems;
- Diagnosis and treatment of human brain diseases based on intelligent dynamic modeling;
- Other related topics.

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
