Finland

Deadline for manuscript
submissions:
closed (30 November 2023)

Message from the Guest Editors

Molecular dynamics (MD) modeling is a powerful approach that can be used to simulate molecular motions and interactions over a period of time. In recent years, state-of-the-art computational platforms and advanced MD methods have made it possible to provide plausible explanations for various biological events, as well as predicting drug binding kinetics or material properties, thus reducing the need for tedious and expensive experimental procedures.

The aim of this Special Issue is to present a contemporary overview of the application of MD simulations in material and life sciences, especially in the context of drug discovery and development. Original research papers and short communications, as well as review articles that address the theoretical and methodological aspects of MD simulations, are all welcome. The submission of articles covering the topics listed below are particularly encouraged.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
