Dr. Luigi Sciubba

ENEA—LEA Laboratory for the Environment, Via Martiri di Monte Sole 4, 40129 Bologna, Italy

Deadline for manuscript submissions:

15 September 2024

Message from the Guest Editors

Dear Colleagues,

Analytical chemistry, in particular, is constantly striving to improve and revolutionize the established analytical methods by enabling the analysis of increasingly complex samples. On the other hand, microbiological characterization together with the development of biotechnology, has enabled increasingly better knowledge of the physiology, metabolism and genetics of microorganisms both for their application and for the control of potentially pathogenic microorganisms.

This Special Issue seeks high-quality research focusing on the latest novel advances in chemical and microbiological characterization processes and techniques. Topics include, but are not limited to, the following:

- The detection of trace chemical and microbiological emerging contaminants;
- Rapid, real-time, process-integrated analysis techniques;
- The assessment of investigated processes for chemical and microbiological characterization using a holistic approach;
- The environmental sustainability of analytical methodologies (e.g., green chemistry);
- Biodegradability assessment.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
