

Studies of the Dosage Form and Stability of the Drug by Various Techniques

Guest Editor:

Prof. Dr. Alina Pyka-Pająk

Department of Analytical
Chemistry, Faculty of
Pharmaceutical Sciences in
Sosnowiec, Medical University of
Silesia in Katowice, Jagiellońska
4, 41-200 Sosnowiec, Poland

Deadline for manuscript
submissions:

closed (5 November 2023)

Message from the Guest Editor

This Special Issue, “Studies of the dosage form and stability of the drug by various techniques”, aims to curate novel advances in the development and application of different analytical techniques in drug analyses. Topics include, but are not limited to:

- the dosage form of the drug and its stability;
- physical factors influencing the shelf life of medicinal products;
- chemical factors influencing the shelf life of medicinal products;
- microbiological factors influencing the shelf life of medicinal products;
- stabilization treatments during drug preparation;
- drug stability study;
- drug purity testing;
- the use of new media in the formulation of a dosage form with model substances;
- influence of the composition of the tablet mass on the availability of micro and macro elements;
- determination of the active substance in medicinal products;
- drug quality assessment;
- dosage form technology.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
