Deadline for manuscript
submissions:

15 April 2021

Message from the Guest Editor

Biofuels combined with electricity have assumed such an important role that they are increasingly seen as a potential solution to the transport problems. The production and use of biofuels in a sustainable way is still a challenge, regardless of the evident research efforts and political objectives. This is a complex multidisciplinary problem that encloses issues such as

- Raw materials and pretreatments;
- Process;
- Catalysis;
- Purification process;
- By-products;
- Applications.

We invite submissions to a Special Issue of the journal *Processes* on the topic of state-of-the-art biogas and biofuels; processes; future perspectives; and challenges.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/systems related research in chemistry, biology, materials and allied engineering fields. Our goals are to publish high impact articles of broad interest to the process systems community and to serve as a forum for major developments in process/systems research. The journal publishes regular research papers, communications, letters, short notes, and reviews. There are no restrictions on the length of published articles or on the use of color illustrations. All submitted manuscripts undergo rigorous peer review prior to publication.

Author Benefits

Open Access:—free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: Indexed in the **Science Citation Index Expanded** (Web of Science) and **Inspec (IET)**. Covered in **Scopus** from Vol. 5 (2017).

CiteScore (2019 Scopus data): **1.8**.
