submissions:

30 November 2021

Message from the Guest Editors

Dear Colleagues,

Biochar, a biomass-derived carbon material, has been demonstrated to be a possible material to promote sustainability in different fields from composite production where biochar is used as eco-friendly alternative to oil-derived carbon materials, to the use of biochar in all the fields where other carbon materials are used.

This Special Issue aims to:

1. Explore all the new possible applications in the field of biochar. In particular, papers where biochar is the key factor for innovative applications that promote sustainability will be accepted.
2. Provide an up-to-date picture of recent advances and outstanding innovations in the field of biochar applications. Studies in different fields where biochar is the main actor will be welcome.

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access:— free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **CAPus / SciFinder**, **Inspec**, and many **other databases**.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 11.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2021).
