Message from the Guest Editor

Dear Colleagues,

This Special Issue seeks papers that deal with modeling, control, and monitoring of biomedical systems. The scope of this Special Issue includes, but is not limited to, modeling of physiological systems, modeling of drug pharmacokinetics and pharmacodynamics, the use of advanced or novel sensors and actuators, control algorithms, and fault detection and isolation. A strong preference will be given to articles that include animal and or human studies and with clinical physicians as co-authors.

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.
