### **Bioremediation Processes of Contaminated Soil and Sediments**

Guest Editor:

## Prof. Dr. Mait Kriipsalu

Chair of Rural Building and Water Management, Estonian University of Life Sciences, Tartu 51006, Estonia

Deadline for manuscript submissions:

closed (5 February 2021)

# Message from the Guest Editor

This Special Issue on "Bioremediation Processes of Contaminated Soil and Sediments" seeks high-quality research and case studies focusing on the purification of soils, sludges, and sediments. Topics include, but are not limited to the following:

- Removal of contamination and sustainable approaches to remediation;
- Biological remediation processes and technologies;
- Novel methods of characterization, treatment, and monitoring.

# **Message from the Editor-in-Chief**

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus,

SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous*))
