Deadline for manuscript submissions:

**15 March 2020**

### Message from the Guest Editors

Topics include, but are not limited to applications in the following areas:

- Design and simulation of a novel or revamped chemical process
- Optimization of the processing capacity and operating conditions of a current chemical process
- Improvement of equipment design and the performance of a specific chemical process
- Monitoring safety and operational issues in chemical plants
- Identification of energy savings opportunities, material integration and economic evaluation to realize savings in the process design
- Development of efficient numerical and optimization methods with applications in chemical and energy engineering

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/systems related research in chemistry, biology, materials and allied engineering fields. Our goals are to publish high impact articles of broad interest to the process systems community and to serve as a forum for major developments in process/systems research. The journal publishes regular research papers, communications, letters, short notes, and reviews. There are no restrictions on the length of published articles or on the use of color illustrations. All submitted manuscripts undergo rigorous peer review prior to publication.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** Indexed in the Science Citation Index Expanded (Web of Science) and Inspec (IET). Covered in *Scopus* from Vol. 5 (2017).

**CiteScore** (2018 Scopus data): 2.05.
