Message from the Guest Editors

This Special Issue on “*Progress in Energy Conversion Systems and Emission Control*” seeks high-quality works and topics focusing on progress made not just in conventional energy conversion systems but also alternative systems with significant potential, as well as the environmental impact of the emissions from these systems and control measures. The Special Issue will publish both original research and review articles.

The potential non-exhaustive list of topics to be covered includes:

- Energy systems for biomass conversion
- Modelling and simulation of energy systems
- Algal systems
- Biochemical systems
- Thermochemical systems
- Combustion kinetics
- Emission measurements
- Syngas analysis
- Life cycle analysis
- Technoeconomic analysis

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
