Deadline for manuscript submissions: **closed (31 October 2020)**

**Message from the Guest Editors**

This Special Issue focuses on fluidized bed hydrodynamics and transport phenomena and aims to attract top-quality studies addressing recent advances in the fundamental and applied aspects of fluidized beds and fluidized systems. A non-exhaustive list of topics follows:

1. Green energy technologies (CLC, CCSU, hydrogen, biofuels, solar)
2. Solids mixing and separation in gas, liquid, and three phase systems
3. Cohesive powder fluidization: characterization methods, assisted fluidization
4. Complex particle production: synthesis, agglomeration, granulation, coating
5. Particle attrition and fragmentation (jets, cyclones, impacts)
6. Advanced computational techniques (TFM, DEM-CFD, MP-PIC, coarse-graining, AI)
7. Dynamics, scale-up, and optimization
8. Innovative solutions (micro-scale, staged) and applications
9. Ancillary equipment: cyclones, non-mechanical valves

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAplus / SciFinder, Inspec, and many other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 11.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2021).
