Message from the Guest Editor

In the development of health-promoting food ingredients and functional food processing, the focus of laboratory studies is primarily on edible and medicinal mushrooms, food processing and preservation technology, functional food ingredients processing, and bioproducts processing. Functional food ingredients can be obtained from various bioresources, such as plants, animals, microorganisms, and marine sources, as well as their by-products. Contributions that deal with new developments in processes and that can be given quantitative expression are encouraged.

This Special Issue of *Processes* will present a collection of research articles and reviews related to the development of advances in natural product food processes. According to the desired products, several production steps are required in order to produce a food product from raw ingredients, to change the physical and chemical appearance of the product, to ensure food safety, to ensure a consistent quality, and to improve shelf-life, etc.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
