Message from the Guest Editors

This Special Issue on “Application of Fuzzy Control in Computational Intelligence” aims to curate novel advances in the development and application of fuzzy control in computational intelligence to address challenges in artificial intelligence and automation technology. Topics include, but are not limited to the following:

- Development of novel fuzzy control technology;
- Soft computing applications with fuzzy control;
- Hybrid fuzzy control combined with intelligent computing methods;
- Theory and application of fuzzy control for intelligent systems.

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **Inspec**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
