Message from the Guest Editors

This Special Issue on “Green Supply Chain Management (GSCM): Design, Planning, and Optimization” aims to curate novel advances in the development and application of green supply chain modeling to address longstanding challenges toward sustainability. Topics include but are not limited to:

- Development of new green supply chain management models;
- Diagnosis of green supply chain management strategies which make use of model predictions;
- Integration of open-loop or closed-loop control to drive green supply chain management toward sustainability; and
- The development of industry 4.0 methodology to aid green supply chain management.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**,
SCIE (Web of Science), **Ei Compendex**, **Inspecc**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
