Materials for Electrochemical Systems: Design and Characterization

Guest Editor:

Dr. Dhanasekaran Vikraman

Division of Electronics and
Electrical Engineering, Dongguk
University-Seoul, Seoul 04620,
Republic of Korea

Deadline for manuscript
submissions:

closed (10 February 2022)

Message from the Guest Editor

In the last couple of decades, nanomaterials and 1- and 2-dimensional materials have served as gifted materials for various applications, including energy, opto-electronics, bioelectronics, sensors, and biological applications. Recently, nanocomposites, polymer-mixed nanocomposites, and metal organic frameworks have ruled the materialist world due to their unbelievable performance in various electrochemical devices. Hence, this Special Issue is especially focused on publishing novel materials design and characterization for future electrochemical systems. Further, we have planned to extend its scope towards novel characterization techniques to analyze the materials' capability for device fabrications.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
