Message from the Guest Editors

This Special Issue on “Multi-Period Optimization of Sustainable Energy Systems” aims to curate novel advances in the development and application of PSE and alternative tools to address longstanding challenges in the synthesis and design of sustainable energy systems for multi-period operations. Topics include but are not limited to:

- Energy-related resource conservation networks;
- Distributed multi-functional energy systems (e.g., trigeneration and polygeneration systems);
- Regional or sectoral low-carbon energy systems;
- Bioenergy supply chain networks;
- Penetration of renewable energy through energy storage; and
- Power-to-X (P2X) systems.

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
