

Optimization for Control, Observation and Safety

Guest Editors:

Prof. Dr. Guillermo Valencia-Palomo

Dr. Francisco Ronay López-Estrada

Dr. Damiano Rotondo

Deadline for manuscript
submissions:

closed (30 September 2019)

Message from the Guest Editors

In this SI call, the aim is to offer an overview of the state-of-the-art of the most advanced (online and offline) optimization techniques and their applications in control engineering. Potential topics include (but are not limited to):

- Optimal control of linear and nonlinear systems;
- Optimal control of complex systems;
- Predictive control;
- Optimal observer design;
- Numerical optimization;
- Convex optimization through linear matrix inequalities;
- Evolutionary optimization;
- Constrained optimization;
- Takagi–Sugeno systems;
- LPV systems;
- Fault detection and isolation;
- Fault tolerant control.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
