L8S4L7, Canada

Deadline for manuscript
submissions:
closed (31 October 2018)

Message from the Guest Editor

This Special Issue on "Modeling and Simulation of Energy Systems" will curate novel advances in research which either use modeling and simulation as an important component of the analysis of energy systems, or, present the development of new and better models of energy systems or energy system components. In order to maximize impact, authors contributing to this Special Issue will be invited to deposit their process models in the open access repository for the process systems engineering community at PSEcommunity.org and/or provide as supplementary material. These may include contributions such as process simulation files, computer code, spreadsheets, model files, optimization codes, or other relevant digital objects used for modelling and simulation purposes with either commercial or open source software.

Special Issue

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus,
SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.
Journal Rank: JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
