Development and Application of Microalgae and Microalgae–Bacteria Biotechnologies

Message from the Guest Editors

This Special Issue on the “Development and Application of Microalgae and Microalgae–Bacteria Biotechnologies” seeks high-quality works focusing on microalgae–bacteria interactions that are applied to or established during biotechnological processes. Topics include, but are not limited to, the following:

- Uses of microalgae–bacteria interactions to remove contaminants from the environment.
- Application of bacteria to improve the metabolism of microalgae during a biotechnological process.
- Basic studies of metabolites and mechanisms of interaction between microalga and bacteria during a biotechnological process.
- Characterization of microalga–bacteria biomass produced during a biotechnological process.
- Uses of microalga–bacteria biomass for agricultural proposes.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
