Special Issue

Application of Adaptive Control, Fault Detection and Deep Learning in Electrical Engineering

Message from the Guest Editors

The growing global population and rising energy demands are driving significant advancements in electrical systems, which must adapt to meet these challenges. Adaptive control, AI-based fault detection, and deep learning are driving innovation and shaping the future of electrical engineering, leading to smarter, more efficient, and reliable systems.This Special Issue on “Application of Adaptive Control, Fault Detection and Deep Learning in Electrical Engineering” aims to cover recent advances in the applications of adaptive control, fault detection and deep learning in electrical engineering. Topics include, but are not limited to, methods and/or application in the following areas: smart grids and energy management; electric vehicle (EV) systems; renewable energy integration; robotics and industrial automation; power electronics and drives; microgrids and distributed energy resources (DERs); aerospace and defense systems; smart metering and load forecasting; control systems and artificial intelligence.

Guest Editors

Dr. Stephen Oladipo

Department of Electrical and Electronic Engineering Science, University of Johannesburg, Johannesburg 2006, South Africa

Dr. Sheng Yang

School of Energy Science and Engineering, Central South University, Changsha 410083, China

Deadline for manuscript submissions

closed (31 January 2026)

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
