

Special Issue

Innovative Drug Delivery Through Chemically Synthesized Polymers and Terpenoids

Message from the Guest Editor

This collection aims to provide a platform for exploring the design, synthesis, and functional evaluation of new polymeric materials specifically tailored for drug delivery. Additionally, it will investigate the distinctive properties of terpenoids, which are gaining recognition for their ability to improve the bioavailability and therapeutic index of drugs. Contributions are expected to cover various topics, including:

- The modulation of drug release kinetics via chemically synthesized polymers;
- Interactions between terpenoids and biological membranes and their effects on drug absorption;
- Strategies for co-delivering multiple therapeutic agents using polymer–terpenoid conjugates;
- Approaches to overcoming biological barriers with these innovative materials;
- Performance evaluation of these advanced drug delivery systems.

This Special Issue aims to serve as a valuable resource for researchers, pharmaceutical scientists, and clinicians, offering a comprehensive overview of the latest advancements, challenges, and future directions in drug delivery research.

Guest Editor

Dr. Seyed Ebrahim Alavi

School of Medicine and Dentistry, Griffith University, Brisbane, QLD 4215, Australia

Deadline for manuscript submissions

27 October 2025

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
