

Special Issue

Research on Water Pollution Control and Remediation Technology

Message from the Guest Editor

Reducing water pollution essentially requires the application of good practices by users of water and aquatic environments throughout the catchment area, including encouraging less-polluting activities, improving use to reduce the quantity of substances used or discharged, and intercepting pollutant flows. This Special Issue will be devoted to articles describing preventive and remediation actions in a variety of fields as well as the socio-economic aspects of the environmental protection industry: waste and industrial wastewater, new technologies in sanitation and water pollution, environmental waste, contaminated soil, air pollution, and more. This Special Issue therefore welcomes original research and review articles covering the following topics:

- Water and aquatic environments;
- Research on water pollution;
- New technologies in sanitation and water pollution;
- Water pollution;
- Contaminated soil;
- Air pollution and more.

We welcome contributions from all those who are active in the field of environmental protection.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
