

## Special Issue

# CFD Applications in Renewable Energy Systems

### Message from the Guest Editors

Renewable energy systems play a major role in the solution to global problems such as the energy crisis and climate change. The need for better and more efficient renewable energy systems requires state-of-the-art techniques and tools for their design and analysis. Computational fluid dynamics (CFD) is one of those tools that have become a standard in the design process of thermal fluid systems. This Special Issue is focused on the application of CFD to the design, analysis, and optimization of renewable energy systems.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto  
Department of Drug Science and Technology, University of Turin, Via P.  
Giuria 9, 10125 Turin, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
