

Special Issue

Extraction, Isolation, Stabilization, and Identification of Plant Bioactives

Message from the Guest Editors

We are pleased to invite you to contribute to the Special Issue "Extraction, Isolation, Stabilization and Identification of Plant Bioactives" in the *Processes* journal. Recent studies emphasize the advantages of "green" extraction techniques for bioactives' isolation versus conventional ones. Another important segment in bioactives' utilization is their stability. One of the most reliable methods for protecting and stabilizing the bioactives is encapsulation. Additionally, encapsulation provides controlled delivery to the target place in the organism and protection in the GI tract and has been reported to increase the bioavailability of plant bioactives. The selection of the proper isolation and stabilization procedure depends on the properties of the bioactives and the final purpose and designation of the product. Therefore, the present Special Issue aims to provide a platform for the scientific community to present high-quality research focused primarily on the extraction, processing, identification and encapsulation of plant bioactives.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P.
Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
