

Special Issue

The Use of Nanomaterials for Advanced Wastewater Treatment Technology

Message from the Guest Editors

Nanomaterials for advanced wastewater treatment technology include not only the removal of pollutants from them, but also the regeneration of resources using innovative methods of the wastewater treatment process. It is planned to isolate the most important topics related to wastewater management and treatment technologies, further improving the quality of wastewater beyond the capabilities of conventional technologies. Nanomaterials for advanced wastewater treatment technology are also related to numerical process modeling, water quality, legal regulation, economics and management, risk assessment and benefit to society. This special issue of “The use of nanomaterials for advanced Wastewater Treatment Technology” aims to review recent advances in the development and application of process integration and intensification.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
