

Special Issue

Computational Biology Approaches to Genome and Protein Analyzes, 2nd Edition

Message from the Guest Editor

This is the second volume of the previously successful Special Issue "[Computational Biology Approaches to Genome and Protein Analyzes](#)". Currently, the amount of experimental biological data is continuing to increase. This is connected with the necessity of developing new more effective methods, algorithms, and implementations as computer programs, which will allow for an in-depth understanding of the meaning of the data. New approaches are especially important during the analysis of genomes (including sequences) and proteins, allowing for the establishment of a complex sequence–function relationship. Potential topics covered by this Special Issue include, but are not limited to, ideas, methods (including artificial intelligence, machine learning, mathematical, and statistical methods), algorithms, implementations, and computer programs used to analyze genomes (including sequences) and proteins, as well as establishing a sequence–function relationship. Original articles and reviews addressing these topics are welcomed.

Guest Editor

Prof. Dr. Andrzej Kasperski

Department of Biotechnology, Institute of Biological Sciences,
University of Zielona Góra, Szafrana 1, 65-516 Zielona Góra, Poland

Deadline for manuscript submissions

25 December 2025

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
