

Special Issue

Synthesis, Catalysis and Applications of Organic Chemistry

Message from the Guest Editor

The value of organic compounds in our everyday lives ensures that their synthesis attracts the attention of innovators both in the industrial and academic worlds. Goods produced by organic chemistry processes play an essential role in all aspects of modern life, including agriculture, food production, drug development, and the manufacturing of new materials or fuels. The wide range of applications of organic chemistry and the need to discover more sustainable methods of producing them have led to interesting recent developments in synthesis, new catalysts, and novel applications of a range of products.

Guest Editor

Dr. Steve D. Pollington

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
