Special Issue

Modeling and Simulation of Robot Intelligent Control System

Message from the Guest Editors

This Special Issue on the "Modeling and Simulation of Robot Intelligent Control System" focuses on the latest research on the theoretical and practical aspects of modeling, simulating, and controlling intelligent robotic systems. This issue covers a range of topics, including advanced control techniques for robotic systems, the simulation of robotic behaviors, the integration of artificial intelligence in robots, and the development of algorithms for autonomous navigation and task execution. Researchers are invited to submit their latest findings on improving the efficiency, accuracy, and reliability of robot control systems through innovative modeling and simulation approaches. This Special Issue seeks contributions that address these challenges and propose solutions for enhancing robotic systems' adaptability and performance in various environments.

- Robot control systems
- Intelligent robots
- Simulation
- Intelligent control systems
- Artificial intelligence
- Modeling of robotic systems
- Decision-making algorithms

Guest Editors

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
