

Special Issue

Recent Advances in Energy and Dynamical Systems

Message from the Guest Editor

Energy studies and dynamical systems, with their recent applications in various disciplines, serve as a cornerstone of modern science. In recent years, process control engineers have focused on optimizing the monitoring and control of process operations and implementing advanced process control and real-time optimization applications. In this respect, modeling and simulation of dynamical systems play a particularly important role in their development. This Special Issue aims to bring together cutting-edge research that explores recent advances at the intersection of energy and dynamical systems. We invite submissions that delve into the theoretical foundations, computational methodologies, and practical implications of energy and dynamical systems. Potential topics include, but are not limited to, the following:

- Control of dynamical systems;
- Data-driven dynamics;
- Estimation of energy and dynamical systems;
- Differential equations and their applications in energy, biology, and engineering;
- Mathematical modeling and analysis of process control;
- Simulation of dynamical systems;
- Fault detection of energy systems;

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P.
Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
