

Special Issue

New Advances in Nanomaterials for Biomedical Diagnostics and Therapy

Message from the Guest Editor

In the dynamic landscape of biomedical research, nanomedicine captivates global attention for its remarkable capabilities. The flexibility of nanomaterials to couple with various substances opens doors to a realm of possibilities. Whether through chemical conjugation, physical encapsulation, or adsorption, these loaded nanosubstances pave the way for the targeted delivery of drugs, chemotherapeutic agents, imaging substances, or vital biological entities. This Special Issue is dedicated to showcasing a collection of studies centered on the latest advancements in nanomaterials tailored for diverse applications in biomedical tracking, detection, and treatment across various scenarios. Researchers from a wide array of disciplines are encouraged to submit manuscripts, exploring areas such as:

- Development of nanomaterials for diagnosing cancer and chronic diseases.
- Therapeutic treatments using both loaded and non-loaded nanomaterials.
- Integration of nanotechnology with other methods for tissue regeneration.
- Development of nanomaterials for immunization and vaccine production.
- Innovative approaches to synthesize, fabricate, and characterize nanomaterials.

Guest Editor

Dr. Hong Niu

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
