

## Special Issue

# Pharmacodynamics Modeling of Anti-inflammatory Drugs (2nd Edition)

### Message from the Guest Editors

This Special Issue on “Pharmacodynamics Modeling of Anti-inflammatory Drugs (2nd Edition)” aims to establish a more detailed mechanism of action for natural products appropriate for precision medicine. Topics include, but are not limited to, the following:

- Development of new natural products to modulate the hyperproduction of cytokines in macrophages induced by pathogens;
- Evaluation of the anti-inflammatory effects of natural products by suppressing the activation of the STAT pathway;
- Research on the calcium signaling pathway in inflammation alleviated by natural products;
- Study of the effects of natural products on inflammatory diseases related with mitogen-activated protein kinase;
- Investigation of analgesic and anti-inflammatory effects of natural products with the serum cytokine level;
- Study of the regulatory effects of natural products on the endoplasmic reticulum stress-related signaling pathway.

---

### Guest Editors

Prof. Dr. Wansu Park

Prof. Dr. Myung Sook Oh

Prof. Dr. Jai-Eun Kim

---

### Deadline for manuscript submissions

5 November 2025

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
