

Special Issue

Advances in Ceramic Processing and Application of Ceramic Materials

Message from the Guest Editors

Ceramics can be considered significant constituents of world technical and scientific progress. Modern ceramic materials, made using advanced methods and from specially synthesized and prepared starting powders, are used in space engines, aviation, electronics, metallurgy, chemistry, medicine and surgery. Oxide ceramic materials found their applications somewhat earlier, but their excellent properties still excite designers and engineers. Nitride- and SiAlON-based ceramics attracted attention between 1970–1990, but nowadays the interest to nitride-based compounds is growing. Carbide- and boride-based ceramics are waiting to be implemented in the future jets and space vehicles. Yet, all these excellent materials only find their applications through advanced processing, because the extreme properties of ceramic materials may only be reached through precise processing. The Special Issue is devoted to:

- Advances in Ceramic Materials
- Advances in Ceramic Processing
- Application of Ceramic Materials

Guest Editors

Dr. Andrey Yurkov

Dr. Denis Kuznetsov

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
