Special Issue

Application of Nanofibres in Sustainable Fashion and Textiles

Message from the Guest Editors

The nanofibres played an important role in the development of textile and clothing materials for a range of applications, continuing to play an import role in our daily lives, be in the form of face masks, filters, sensors, wound dressings, among others. It is well known that the textile and clothing industry is one of the major sources of global pollution in terms of use of resources and materials. Therefore, over the last few years, focus has been directed towards the development of sustainable materials, including fabrication of nanofibers from sustainable sources and their applications in several areas.

This Special Issue, titled "Application of Nanofibres in Sustainable Fashion and Textiles", seeks high-quality works focusing on the latest developments in nanofibers for sustainable fashion and textile applications. Topics include, but are not limited to: Fabrication and characterization techniques for sustainable nanofibers; Applications in different areas of fashion and textiles, such as apparel, filtration, waste water treatment, packaging, etc.; Sustainable benefits of nanofibers; Hazards and challenges associated with sustainable nanofibers.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
