

## Special Issue

# Synthesis, Characterization and Functional Properties of Green Nanocomposites

### Message from the Guest Editors

This Special Issue seeks contributions that explore the fabrication of eco-friendly polymeric matrices, the functionalization of nanofillers, structure–property correlations, advanced characterization techniques, and the performance evaluation of these materials under various environmental conditions. Topics include but are not limited to the following:

- The synthesis of green nanocomposites using renewable or biodegradable polymers;
- Functionalization and dispersion techniques for bio-based nanofillers;
- Structure–property relationships in green nanocomposites;
- Advanced characterization methods for green nanocomposites;
- Mechanical, thermal, and barrier property evaluation;
- Applications in packaging, biomedicine, energy, environmental remediation, and coatings;
- Sustainable processing routes and scalability;
- Life cycle analysis and environmental impact assessments;
- Biodegradation behavior and eco-toxicological studies;
- The integration of green nanocomposites in industrial applications.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

CiteScore - Q2 (Chemical Engineering (miscellaneous))
